ABSTRACT

Printed instructions can be included with the tray in a medical procedure kit.—The printed instructions can include instructional material, such as pictorial, step-by-step instructions intended for a health care services provider for using the medical procedure kit. The printed instructions can also include a separate patient aid, suitable for inclusion within the medical procedure kit, which includes patient education information relating to a particular medical procedure. To make recognition easier, the patient aid can be configured with a greeting card appearance, activity sheet appearance, or other graphical indicia that indicates that the patient aid is intended for the patient and should be delivered to the patient.
